EXPERIENCE

Grid Dynamics, Software Engineer Intern — Gdansk, Poland | Dec 2024 – Jun 2025

- Contributed to a team-led Weather App (React 19, Firebase, two external APIs):
  - Designed search/settings forms with real-time validation, writing 15 Vitest unit tests that cover 90% of form logic.
  - Reviewed an average of 5 PRs weekly, catching ~3 styling or logic issues per sprint.
- Built multiple landing pages and feature prototypes (React, Tailwind CSS, TypeScript) that maintain 75+ Lighthouse performance scores across breakpoints.
- Engaged in full Scrum lifecycle (daily stand-ups, sprint planning, backlog grooming, retrospectives) and tracked tasks/progress via Jira and ClickUp.

Freelance, Junior Frontend Developer — Remote | Jul 2023 – Dec 2024

- CRM System (Vue 3, TypeScript, Pinia, MySQL):
  - Implemented mailing functionality using a RESTful API.
  - Developed dynamic profile forms with Composition API & Pinia.
  - Collaborated with backend engineers to design API contracts for MySQL database.
- Landing Pages (Vue 3, TypeScript, Nuxt.js, Tailwind CSS):
  - Created 5 SEO-optimized landing pages that score 75+ Performance & 95+ Accessibility in Lighthouse (desktop & mobile).
  - Optimized asset loading via code-splitting and image lazy-loading.
  - Configured multilingual support (EN/PL/UA) for 200+ text strings with vue-i18n.
- Participated in sprint planning, backlog grooming, demos (Space, YouTrack), and managed Git workflows (feature branches, PRs).
